

ARTOS Lambda 2

Transparency, elegance and structure
for facades and interiors

Data sheet

ARTOS Lambda 2

ARTOS Lambda 2 is a wire cloth with different structures on the front and rear sides. The fabric is defined by the cams on one side and the completely smooth surface on the other.

It is rigid in weft cable direction and flexible in warp direction. Lambda is suitable for partition walls, ceiling coverings, protection against the sun, or in trade fair booths.

With a denser weave it can also be used as floor decking.

Technical data:

Type	Material	Open area	Weight	Fall protection	Sub construction
Lambda 2	stainless steel standard V4A	35.40%	6.78 kg/m ²	provided	clevis brackets, frame / tenter
