

ARTOS Sigma 2

Transparency, elegance and structure
for facades and interiors

Data sheet

ARTOS Sigma 2

ARTOS Sigma 2 is a fabric with high translucency, flexible in the direction of the warp and stiff in the other direction.

Variable in its weave ability with 2, 3 or 4 warps and customizable in the mesh size, you can reach a great range of openness.

Suitable for wall- or ceiling coverings, on facades or as sun protection, as well as for banister fillings or balconies.

Technical data:

Type	Material	Open area	Weight	Fall protection	Sub construction
sigma 2	stainless steel standard V4A	66.40%	8.41 kg/m ²	provided	clevis brackets, brackets for round bars
